If you foreplay in the beginning it doesn’t matter if you last five minutes because she will already be pleased plus the fact that after a good foreplay is easier to make her CUM. Keep in mind to take the time when doing foreplay and there is no need to rush.

SEX TIPS

1-BE PROUD OF YOUR BODY: Some people are just not comfortable with their self’s, meaning they don’t fully like and are not ok with their body’s. These people dislike their body or body part and are ashamed, if that happens is for the best to avoid sex, meaning you are not ready for it. Get comfortable with your body first, do that before you let anybody else see your body.

2-CONDOM: You should always use a condom, you will never in your life regret using one but you sure as hell are going to regret never using a condom. You probably know what a condom is for, avoid letting you get STD’s and unwanted pregnancies. Remember always once you get an STD there is no coming back.

3-SHAVE IT: Some people dislike pubes, and think that having pubes is sign of lack of hygiene. So you should shave it you are going to have sex for the first time with someone. Shaving helps keeping a good look and a good hygiene.

4-CLEAN YOURSELF: Hygiene is really important, especially if you are about to have sex. Mainly no one will have sex with you if you show up right after hitting the gym, you should keep taking between 2 and 3 daily showers. And if you know you are about to SMASH in a few hours just go and take a bath.

5-YOU WILL NEVER BE READY: Something people will also not tell you is that you will never be ready for sex. You will never be mentally prepared or ready to it until it just happened, sometimes you will just have to jump right at it.

6-GET TESTED: First even if you are not sexual active you should go and get tested, but if you are sexual active it is crucial that you get your self tested, what if you have something and you keep passing on to other people, and what if you have and don’t know it, when you should be doing a treatment. Get your self tested and avoid being on this types of satiations.

7-1ST TIME IS NOT THAT SPECIAL: The first time will probably going to suck, so do not create high expectations about it. Remember that you are unexperienced so the first time is not going to be that great, is probably not going to be great at all. It’s usually awkward, it’s done in less than five minutes, very anxious and nervous, so don’t create expectations and you will not be deceived.
8-DON'T WHATCH TO MUCH PORN: Watching too much porn will make you bad at sex, because you will create high expectation, compare yourself with the porn actors and you are more proportioned to do what you saw. Those guys are used to do that plus the fact that what you see is an act, it is not real and most women don’t even like those types of things. Do not watch too much pornography.

9-DON'T BE SELFISH: Sex it's all about give and take, on bed everything should be 50-50. Most men just want to get and don’t give, remember to also please your partner and you to shouldn't forget to CUM, you deserve to be pleased. Some women forget to just CUM and think only on pleasing the men. Ladies don’t forget to CUM, men don’t forget to please them too.

10-DO NOT CLOSE THE LIGHTS: Girls do not ask them to turn the lights off, men do not like that and they also don’t like unsecure girls, besides the fact that they want to see you. Don’t tell men to turn off the lights.

11-BIG DICK AREN'T ALL: Big dick aren’t all, this is valid for both women and men. Girls should just go after what feels good, and boys shouldn’t be afraid to have sex due to their size. Many girls already said that some big dick are just painful and others are just to boring due to their massive size. Put in mind that mature women won’t judge you for your size.

12-TELL HER/HIM WHAT YOU WANT: If he/she is done but you are not pleased don’t be afraid to tell him/her what you really want, talk to her/him and say how can she/he make you CUM, and don’t forget to talk with patience and seriously. Do not neglect your needs, if she/he is done don’t fake it, just say it “no I am not satisfied”.

13-AFTER SEX CLEAN UP: Don’t go straight up to sleep after having sex, you should always clean your self. This is more valid towards girls, shower or just wash up your vagina, avoiding this and going to sleep right after sex may cause you to get an infection.

14-HAVE FUN: Sex is about enjoying yourself, it should be fun, so don’t take it that serious and don’t forget to just have fun. Sex shouldn’t be full of stress nor dramatic.
HOW TO FINGER HER

1-PREPARE YOUR HANDS: Before you even have her on your sight you should first get your nails groomed up, girls will look at that, and they will definitely like it if they are in good shape plus it will avoid you hurting them when inserting the finger and not forgetting that having them clean will also avoid any kind of infection.

2-TEASE HER: Try teasing her the best you can and for the longest time. Get in her zone, kiss her, say sweet things on her ear, caress her and let her beg for it.

3-MAKE HER WET: Before you can insert your finger make sure she is well lubricated, that can be natural, use some lubricant oil ore using saliva. The teasing should have done it, but if not while on her panty’s rub your finger true her labia up and down slowly are just rub your crotch up against her labia making hard but gentle movements. This should get her bagging to put something in, that shall do it.

4-HOW TO ENTER: No, don’t go pumping your fingers right away. You should first make sure she is wet, and even so lubricate your fingers before getting in, lick them, rub her natural lube ore use some oil.

5-ELABORATE: Start first by gently rubbing her clit, then smoothly pass your finger true the labia, you can take your time if you want, when done insert your finger/fingers but remember don’t use them as a penis putting it in and out. Put your fingers on a hook like position and start stimulating her G spot, which is right above inside the vagina, you can go fast and slow whethershe enjoys more, just pay attention to her expressions.
HOW TO GIVE HER HEAD

1-INTRODUCTION TO THE PLEASURE SPOTS

First thing I'll show the most important spots to please a woman. First thing is the clitoris situated outside of the vagina and on the upper part, this spot is extremely sensitive to touches (great spot to play with), then we have the labia (vagina lips) also but less sensitive, later on we have THE VAGINA (where later on you will put your dick in), and then the most important spot is THE G-SPOT situated inside and on the upper part of the vagina, being twice as sensitive as the clitoris this part is the main cause of the female ejaculation. Now you know all, let’s keep up.

2-EATING HER UP

Spread her legs wide open and get your face down there, take your thong out and start liking the clitoris up and down, left to right, how you want to. You gen go all the way down and up, liking just the clit, the labia (vagina lips) or even inserting your thong inside her vagina.
3-Make Her Go Nuts

While liking, kissing and sucking her up, it is time for the mind-blowing move. Get one to two fingers and get them wet first, then get them inside her and start stroking as if you were doing with your penis. If you want to give more to her, bent your fingers up-words and you will fill a kind hard spot that is the G-spot. Start by rubbing it slowly and if notice her loving it too much just increase the peace. All while enjoying the pleasure of making her cum, squirt, moan and scream all because of the immense amount of pleasure.
